

Do you remember when you wanted to grow up to be a fireman?

Have you ever wondered who builds these trucks and how they are manufactured?

Do you know that each fire truck is custom made to exact specifications?

Do you know how much they cost?

If you are curious or if you think that your inner child would enjoy listening to a presentation about fire trucks, please join us on

Thursday September 18th @ 6 PM

E51-335

Dinner will be provided.

Peter Guile is CEO of E-ONE, the leading worldwide designer, manufacturer and marketer of fire rescue vehicles -- with more than 23,000 vehicles in operation around the world.

Mr. Guile has a proven track record of company turnarounds, rebuilding dealer and sales networks and managing complex, international business. He joined E-ONE from Federal Signal Corporation, E-ONE's former parent company, to lead a turnaround that resulted in the sale of the business to a partnership between Mr. Guile, the management team and a leading private equity firm, American Industrial Partners.

Previously, Mr. Guile served as President of Federal Signal's Industrial Systems business within the Safety & Security Systems Group. He began his career in England as International Sales Manager and Director of Sales and Marketing and completed a successful turnaround of Victor Products Ltd. before moving to the U.S. in 2001.

Mr. Guile is a graduate of the University of Michigan Business School Executive Program. He also holds a degree in Mechanical & Production Engineering from the University of Liverpool.

This event is sponsored by MIT's System Design and Management Program.
