

# Sponsorship Opportunities

## MIT Conference on Systems Thinking *Systems Thinking for Contemporary Challenges*

October 22-23, 2009

MIT's conference on systems thinking offers sponsorship opportunities to companies committed to building and promoting a systems thinking capability within their organizations. Because of the large number of attendees expected from industry, government and academia, sponsorships offer an excellent means for your company to gain visibility as a leader in systems thinking.

Sponsorships also provide opportunities for your employees to attend the event, learn about best practices for applying systems thinking, and strengthen your company's systems thinking capability. (See accompanying chart showing various sponsorship levels.) All conference presentations will be designed to enable attendees to apply their learning when they return to work after the conference.

This conference has been created by MIT's System Design and Management program, the Institute's first graduate-level degree granting program that offers career-compatible options for experienced technical professionals. SDM's tiered offerings include an MS in engineering and management, a certificate program in systems engineering, and opportunities for companies to sponsor interdisciplinary thesis research.

### Details
