

Sponsorship Opportunities

2011 MIT Conference on *Systems Thinking for Contemporary Challenges*

Sponsored by MIT's System Design and Management Program

October 24-25, 2011

MIT's Conference on Systems Thinking for Contemporary Challenges offers sponsorship opportunities to companies committed to building and promoting a systems thinking capability within their organizations. Because of the large number of attendees expected from industry, government and academia, sponsorships offer an excellent means for your company to gain visibility as a leader in systems thinking.

Sponsorships also provide opportunities for your employees to attend the event, learn about best practices for applying systems thinking, and strengthen your company's systems thinking capability. (See chart showing various sponsorship levels on reverse side.) All conference presentations will be designed to enable attendees to apply their learning when they return to work after the conference.

This conference is sponsored by MIT's System Design and Management (SDM) program, the Institute's first graduate-level degree granting program that offers career-compatible options for experienced technical professionals. SDM's tiered offerings include an MS in engineering and management, a certificate program in systems engineering, and opportunities for companies to sponsor interdisciplinary thesis research and internships.

Details

Dates: October 24-25, 2011

Location: MIT Wong Auditorium

Attendees: Industry representatives from energy/sustainability, transportation, aerospace, defense, healthcare, equipment, services, government agencies, and others who are working in new product/business development, manufacturing, supply chain, engineering, organizational development, and leadership. MIT faculty, alumni and students are also expected to attend.
