

2017 EMPLOYMENT REPORT

MITsdm
Master of Science,
Engineering and Management

PROGRAM OVERVIEW

System Design and Management (SDM) is the Massachusetts Institute of Technology's master of science degree in engineering and management.

Jointly offered by the MIT Sloan School of Management and MIT's School of Engineering, SDM educates mid-career professionals to lead effectively and creatively by using systems thinking to solve large-scale, complex challenges in product design, development, and innovation.

This report displays employment and compensation statistics gathered from self-funded students who graduated in February, June, and September 2017.

- Senior Engineer
- Senior Manager of Operations
- Senior Program Manager
- Senior Systems Engineer
- Solutions Architect
- Senior Business Systems Consultant
- Technical Product Manager
- Vice President of Engineering

"SDM has been key to accelerating my career. The new skillset I acquired during the program, including systems thinking, innovation, and entrepreneurship, has enabled me to champion digital innovation and diversity of thought at a leading energy corporation. Studying at MIT helped me expand my role beyond the traditional technology business leader."

Edwin Suarez, 2017 SDM Graduate

"Since completing my SDM degree in June 2017, I've worked on four diverse studies along the energy value chain at Shell. Not only did these studies pose great technical challenges, they also included significant and intricate organizational and stakeholder challenges. SDM has given me the methods to tackle these complex issues—from the highly technical to the people problems."

Mina Botros, 2017 SDM Graduate

MIT System Design & Management

77 Massachusetts Avenue, E40-315
Cambridge, MA 02139-4307
